Dm

C

Dm

C

Earth is a won-der-ful pla-net to live on. Oh, no bet - ter world do we know.  
 Lim - it - ed res-cour-ces our earth does of - fer us. To waste them would be a crime.  
 Our heirs de-serve to in-her - it a plan-et that's clean and has res-cour-ces rich.

3 Dm

C

B $\flat$

C

It has sus-tained life for mil-lions of years now and may yet for mil-lions to go.  
 Min-er-als, an - i - mals and plants and soil which to cre-at e took e - ons of time.  
 If we de - file our world there just is no oth-er plan-et to which they can switch.

5 Dm

C

Dm

C

If we take care of it, it will take care of us. More gen - er - a - tions will rise.  
 If we re-duce and re-use and re - cy - cle we'll have them for a fu-ture bright,  
 Each one of us has the res-pon-si - bi - li - ty our pre-cious world to pro - tect.

7 Dm

B $\flat$

Gm

C

If we are thought-less and treat it with care-less-ness we may face our own de-mise.  
 but if we waste them, just throw the a - way, then our fu-ture will be full of blight.  
 Will we step up and pro - tect this great trea-sure, or will we our fu-ture ne-glect?

9 Dm C Dm

What will you leave gen-er-a-tions to come? Do you care

12 Am Dm C Dm

if all you leave them is scum? We de - pend on our earth to stay a-live.

15 C Am C Dm

If we are care-ful and use it with care out grand-child-ren will pros-per and thrive.
